

IN THE CLAIMS

Please amend the claims as follows:

Claim 1. (Previously Presented) A cosmetic pack preparation, comprising:

- (a) 5-20 wt% of polyvinyl alcohol; and
- (b) 0.01-10 wt% of a titanium-titanium dioxide sinter.

Claim 2. (Original) The cosmetic pack preparation according to claim 1, further comprising an anionic surfactant as a component (c).

Claim 3. (Original) The cosmetic pack preparation according to claim 2, wherein the anionic surfactant of the component (c) is one or more anionic surfactants selected from the group consisting of a phosphate-based anionic surfactant, a sulfonate-based anionic surfactant, and a sulfate-based anionic surfactant.

Claim 4. (Previously Presented) The cosmetic pack preparation according to claim 1, further comprising a water-soluble thickener as a component (d).

Claim 5. (Original) The cosmetic pack preparation according to claim 4, wherein the compound (d) is a water swelling clay mineral and/or fine particles of amorphous silicic anhydride.

Claim 6. (Previously Presented) The cosmetic pack preparation according to claim 1, wherein the polyvinyl alcohol of the component (a) is a mixture of

(A) a polyvinyl alcohol of which the aqueous solution with a concentration of 4 wt% has a viscosity at 20°C of 1 mPa·s or more, but less than 30 mPa·s, and

(B) a polyvinyl alcohol of which the aqueous solution with a concentration of 4 wt% has a viscosity at 20°C of 30 mPa·s or more, but less than 70 mPa·s.

Claim 7. (Original) The cosmetic pack preparation according to claim 6, wherein the weight ratio of the polyvinyl alcohol (A) to the polyvinyl alcohol (B) in the component (a) is 0.05-2.

Claim 8. (Previously Presented) The cosmetic pack preparation according to claim 1, further comprising a water-soluble ascorbic acid derivative and/or a water-soluble glycyrrhizic acid derivative as a component (e).

Claim 9. (Previously Presented) The cosmetic pack preparation according to claim 1, further comprising a polyglycerol fatty acid ester as a component (f).

Claim 10. (Previously Presented) The cosmetic pack preparation according to claim 2, wherein the anionic surfactant of the component (c) is dioctyl sodium sulfosuccinate.

Claim 11. (Previously Presented) The cosmetic pack preparation according to claim 1, wherein component (a) is dissolved in water.

Claim 12. (Previously Presented) The cosmetic pack preparation according to claim 1, wherein said component (b) is produced by mixing fine particles of titanium and titanium oxide at a ratio of 1:5 and sintering the mixture at a temperature of 900-1000°C under reduced pressure for 3-5 hours.

Claim 13. (Previously Presented) The cosmetic pack preparation according to claim 1, wherein said component (b) has a particle diameter of 0.6 to 2.0 μ m.

Claim 14. (Previously Presented) The cosmetic pack preparation according to claim 1, wherein said component (b) comprises a mixture of two or more different titanium-titanium dioxide sinters.

Claim 15. (Previously Presented) The cosmetic pack preparation according to claim 1, which is a peel-off cosmetic pack preparation.

Claim 16. (Previously Presented) The cosmetic pack preparation according to claim 1, wherein said component (b) is produced by mixing fine particles of titanium and titanium oxide at a ratio of 1:5 and sintering the mixture.

Claim 17. (New) The cosmetic pack preparation according to claim 1, comprising 7-15 wt% of component (a).

BASIS FOR THE AMENDMENT

New Claim 17 has been added as supported at page 4, last paragraph of the specification.

No new matter is believed to have been added by entry of this amendment. Entry and favorable reconsideration are respectfully requested.

Upon entry of this amendment Claims 1-17 will now be active in this application.
